

INTRODUCING THE AHEADSET[®] SYSTEM

The all-new Aheadset[®] is more than just a collection of individual headset models; it's a system. The Aheadset[®] system intelligently maximizes the interchangeability of parts and minimizes the number of unique parts. The parts included in the Aheadset[®] Small Parts Kit can be used to create 11 different headset configurations, including a ZeroStack™ for threaded or threadless 1" or 1-1/8".
